# TANK FOR DIESEL TRANSPORT STARTANK

**TANK 230 LITRES**

**TANK 440 LITRES**

## FUNCTION AND USE

The STARTANK tank is a transfer system designed for storing, transporting and transferring diesel fuel to vehicles or mechanical devices in general.

It is made of linear polyethylene approved for diesel fuel by means of rotational moulding with constant wall thickness.

The storage tank is equipped with a visible level indicator and a digital litre counter with LCD display is installed on the delivery side of the transfer pump.

The system is powered by connecting the 12 V DC electrical equipment to the vehicle battery using special clamps.

## TECHNICAL FEATURES

- Material: homologated linear PE for diesel fuel
- Wall thickness  $\geq 5$  mm
- Homologated venting
- Anchor belt seats
- Lifting handles
- Inlets for forklift forks
- Lid with mechanical 95° flap closure
- Self-priming volumetric transfer pump 12 Volt direct current
- Dispensing gun

## STANDARDS AND CERTIFICATIONS

The STARTANK tank for use as a container and mobile diesel fuel dispenser, finds application in the following Standards:

- Ministerial Decree 19 March 1990
- Reference standard for the transport of dangerous goods with total exemption according to 1.1.3.1C ADR (transportable volume less than 450 litres)

- Flexible hose length 5 m
- Electrical cables with clamps
- Digital flow meter
- Visual fuel level indicator

**KEY**

- ① Folding lid with opening 95°
- ② Transfer pump
- ③ Electric cable with clamps
- ④ Digital flowmeter
- ⑤ Dispensing nozzle
- ⑥ Load cap
- ⑦ Diesel level gauge
